-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 05 June 2006.

## **DETAILED ACTION**

1. This is in response to the amendment filed on 5 June 2006.
2. Claims 12-16 are pending in the application.
3. Claims 12-16 have been rejected.
4. Claims 1-11 have been cancelled.

### *Response to Arguments*

5. Applicant's arguments filed 5 June 2006 have been fully considered but they are not persuasive.

On page 5, the applicant argues that Liu et al does not teach an Internet service provider without an access point. The applicant argues that the home ISP 64 and local ISP 63 are connected via an Internet connection 65. The applicant argues that this means that the home ISP 64 and local ISP 63 have an access point. The applicant argues that Liu always requires an ISP with an access point.

The examiner respectfully disagrees. The examiner asserts that it is well known in the art that an access point is a device that connects wireless communication devices together to form a wireless network. Nowhere in Liu et al is it disclosed that the network is a wireless network. Therefore, it would not have any access points to the second server.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**6. Claims 12-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu et al U.S.**

**Patent No. 5,898,780.**

As to claim 12, Liu et al discloses a network system comprising:

individual service provider devices each having a first authentication server and access point terminals for connecting user terminals of contracted users of at least one of the individual service provider devices to a network [column 2, lines 38-52];

a parallel service provider device connected to the individual service provider devices, the parallel service provider device having a roaming contract with the individual service provider devices and including a second authentication server and no access point terminal [column 4, lines 5-61]; and

wherein each of the individual service provider devices comprises:

determining means for determining whether a user who issues a connection request from a user terminal is a contracted member of the parallel service provider device [column 4, lines 5-61];

transmitting means for transmitting the connection request to the parallel service provider device to cause the second authentication server of the parallel services provider device to perform user authentication when the user is a contracted member [column 4, lines 5-61];

authentication means for causing the first authentication server of the individual service provider devices to perform user authentication when the user is not a contracted member [column 4, lines 5-61]; and

connecting means for connecting the user terminal to the network and charging the user for connection when a result of user authentication is good [column 4, lines 5-61].

As to claim 13, Liu et al discloses that the connection request comprises an e-mail address including a domain name of the parallel service provider device [column 3, lines 32-67]. Liu et al discloses that the determining means determines whether the user is a contracted member based on the presence or absence of the domain name of the parallel service provider device in the connection request [column 3, lines 32-67].

As to claim 14, Liu et al discloses that the parallel service provider device is connected to the individual service provider devices through an exclusive line [column 3, lines 20-31].

As to claim 15, Liu et al discloses that the individual service provider devices send respective user connection logs to the parallel service provider device [column 6, lines 40-53].

As to claim 16, Liu et al discloses that the parallel service provider device comprises:

receiving means for receiving a user name for a user terminal of a user who requests a signup [column 3, lines 32-67]; and

further determining means for determining whether e-mail addresses including a combination of the input user name and sub-domains of the parallel service provider device has been registered so as to register one of non-registered e-mail addresses [column 3, lines 32-67].

*Conclusion*

**7. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
